

Luanshya: Construction of the City for the Public Interest

At 9:00 May 7, the Luanshya Municipal Government held a grand handover ceremony for the donated trade market of the Luanshya Copper Mines Plc (hereinafter called Luanshya). Luo Xingeng, vice president of the company and the general manager of Luanshya, Mr. NATHAN C.BWALYA, Mayor of Luanshya, and the representatives of the government officials attended the ceremony.

During the ceremony, Mayor of Luanshya said that grain and vegetables were the fundamental material needs. Before the completion of this market, the local sales environment had been in a dirty and chaotic condition for a long time without suitable regulation. The completion of the market would not only change such condition, beautify the city and promote the standardization of order in the city, but also promote local social and economic development in some degree. Therefore, on behalf of the municipal government and the public, the mayor thanked Luanshya for donating the market and highly praised Luanshya on the social welfare contribution over the years. Finally, he said he hoped Luanshya could pursue this consistent style and continue to focus on the construction and development of the local public welfare.

A representative of local traders said that the completion of the market would not only benefit the local people, but also show the concern of the Chinese company on local people's life quality, for which, on behalf of all traders, she expressed her sincere thanks to Luanshya.

Finally, the handover ceremony ended up with celebrating dance of the local people.
