

## **CNMCL Chairman of the Board Luo Tao visiting CNMC Luanshya Copper Mines PLC**

Local time on April 21, 2013, the company's chairman of the board Luo Tao, accompanied by the president Tao Xinghu, visited the CNMC Luanshya Copper Mines Plc (hereinafter called CLM), a company of the listing corporation in Zambia.

Chairman Luo Tao visited the Muliashi Leach Plant, strip mine and Baluba ore concentration plant. In the Muliashi Leach Plant, Luo Tao firstly visited the model room and the central control room, to understand the operation process and system of hydrometallurgy; then he inspected the extraction electrowinning workshop and heap leaching system, and asked the managers to put the heap leaching system into use as soon as possible and at the same time ensure the continuous production output of copper products.

After the site visit, Chairman Luo Tao listened to the work report given by Luo Xingeng, vice president of the company and general manager of CLM, on behalf of the managers. After hearing the report, Chairman Luo Tao, firstly affirmed the current achievements of CLM, and then presented the requirements for the production and business operation in the next step. He pointed out that remarkable achievements had been made since the visit in the last April; the production of Muliashi stirring and leaching system had become more and more stable; the technical and economic indicators of Baluba ore concentration plant had also improved gradually. However,

more attention must be paid to the analysis and control of the production costs, with focus on the cost decreasing and benefit increasing. To a virtuous circle of production and operation, effective measures should also be formulated and executed firmly.

Chairman Luo Tao said work of the following five aspects should be addressed in the next step: firstly, to increase the yield, improve efficiency and reduce costs, so as to achieve the "two up one down"; secondly, to strengthen and consolidate the good relationship with all stakeholders in order to achieve "win-win cooperation"; thirdly, to establish goals, to have the direction and goal in mind when working, and to ensure the implementation of the annual indicators of production and operation through the implementation of phase objectives; fourthly, to provide safety education for employees in Zambia with great emphasis on the production safety and environmental protection; fifth, to care for employees and fully mobilize their enthusiasm through the construction of a harmonious enterprise.

After the meeting, Chairman Luo Tao and the managers of CLM took photos to mark the occasion in front of the office building.
